Name:Ghada Ahmed

Name: Juliana George

Name:Nour Weal

Name:Marwa haron

Project Title:

Real Estate Web Application

Technology:

Frontend: React.js

Backend: Node.js with Express.js

Database: MongoDB

Features:

1. User Authentication

2. Residence Listing Page

3. Filter Residences by Price and Location

4. Book Residence

5. Favorite Residences

6. Add Residence.

7. Residence Details Page

8. Map Integration:

Display properties on a map using the Google Maps API.

Users can click on properties directly from the map to see details.

Filter results based on the map's visible region.
